

A GOVERNMENT FUND FOR ENGLAND'S 10 COMMUNITY
FORESTS TO PLANT TREES FOR CARBON CAPTURE.

TREES FOR CLIMATE

As part of the scheme Forest of Mercia CIC will be
planting new woodlands across South Staffordshire and
the Black Country. We are looking for local private and
public landowners who would like to plant several
hundred or more trees on their land.

England's
Community
Forests

WE CAN PROVIDE FREE NATIVE AND ORNAMENTAL TREES FOR:

WOODLAND CREATION | ORCHARDS
HEDGEROWS | PARKLAND
(as a part of woodland creation)

The fund will cover the cost of providing, planting and initial maintenance of the trees, on an agreement that the new woodland is kept for carbon fixing. The landowner even gets to keep any Woodland Carbon Credits.

As well as carbon capture and to helping to reduce the effect of climate change, the new woodlands will have other positive impacts such as improving and increasing;

Wildlife Habitats

Biodiversity

Flood Protection

Food Production

This is all part of the Government's commitment to increase tree planting to 30,000 hectares per year, across the UK, by 2025 alongside peatland restoration and nature recovery.

If you would like your land to be considered, please contact us.
